- The Contractor shall not prevent or delay the operation of mass transit vehicles at any time. TC = Trolley Coach, MC = Motor Coach, MM = SFMTA Metro. See Subsection 3.3 MASS TRANSIT VEHICLES for more information.
- The Contractor shall perform the appropriate measures to ensure the safety of bicyclists on ALL streets on which there is construction. Contractors shall pay special attention to streets that are on the Bicycle Route Network. See Blue Book Section 9: Bicycle Routes or on the internet at:

### https://www.sfmta.com/maps/san-francisco-bike-network-map.

The Contractor shall install "Bicyclists Allowed Use of Full Lane" signs, or other approved equal, on streets with bicycle lanes during construction.

- The Contractor may close this road to through traffic only during work hours. "Road Closed" signs shall be removed or covered during non-working hours. The Contractor shall set up detour signs in accordance with the approved traffic detour plans as deemed necessary. Local access must be maintained at all times.
- The Contractor shall designate the lane for two-way traffic with a flag person at each end of the two-way road segment to control the flow of traffic. This operation shall be restricted to one block at a time.
  - The Contractor shall designate the lane for two-way traffic for Muni only with a flag person at each end of the two-way road segment to control the flow of traffic. The Contractor shall detour all other through traffic except the one way traffic designated heading northbound (or ♥ southbound, ♥ eastbound, ♥ westbound). The Contractor shall set up detour signs in accordance with the approved traffic detour plans as deemed necessary and shall install/remove or cover/uncover the signs on a daily basis. This operation shall be restricted to one block at a time.
  - The Contractor shall designate the lane for one way traffic heading northbound (or ♣ southbound, → eastbound, ← westbound) as specified during construction hours only with flag person at each end of the intersection to control the flow of traffic. The Contractor shall set up construction signs according to the approved traffic detour plans as deemed necessary and shall install/remove or cover/uncover the signs on a daily basis. Local access must be maintained at all times.

The Contractor shall have one lane open at the specified width in one direction during the actual construction of the concrete street. The direction of this particular lane will depend on the side of the street that is not being reconstructed at that particular time. For example, if the south side of the street is under construction, then the north side of the street shall be open to one-way traffic westbound. The Contractor may only work on onehalf of the street at any one time. The Contractor shall set up and maintain the detour and construction signs according to the approved Traffic Detour Plans as deemed necessary. The Detour Plans for these blocks must include a detour route for SFMTA buses. See Subsection 3.3 MASS TRANSIT VEHICLES for more information.
